

UTAH ENGINEERING

COLLEGE OF ENGINEERING | THE UNIVERSITY OF UTAH

2nd Annual Utah Youth Summit on Alternative Energy June 29, 30 and July 1, 2009

Energy and air quality are critical challenges that face Utah and the World. Join us along with other high school students, researchers and students from the University of Utah College of Engineering, and Utah business leaders for our 2nd Annual Youth Summit. Learn more about ways to solve energy and air quality challenges, and bring your own innovative ideas for stimulating discussions. Find out about important projects in Chemical, Electrical, Civil and Environmental, Computer, Mechanical, Materials and Bioengineering departments and get a chance to talk with faculty and students.

The Utah Youth Summit will be the voice of Utah's Youth in providing a recommendation to Governor Huntsman and the State of Utah about where YOU think Energy and Air Quality policy and technology should go from here. YOUR ideas, thoughts, challenges, and opinions matter. Join us to make a difference.

Registration Deadline: May 15, 2008

Cost: \$25/student (fee waivers available to the first 5 registrants and those in need)

Register on-line at: www.ece.utah.edu/~cfurse/Summit
