

## A Message From the Department Chair

In our Utah BME October newsletter, you can read about the department's top news and stories from July through September 2022 (since our last newsletter). Interesting activities, achievements, and accolades of our alumni, faculty and students await you. You will be introduced to our new University president, and learn about our graduate student STEM outreach to our local community, our state-of-the-field research featured at international conferences, BME graduate student awards, a new engineering building dedicated to a Utah

faculty medical device legend, BME leadership organizing a key biomechanics conference, and the generous vision of a Utah alumnus to award a treasured endowed chair to our faculty in tissue engineering.

Significantly, you should be able to appreciate the scope of our impactful BME efforts to hire fantastic faculty with creative ideas who train talented biomedical engineers who will create our future, innovate our industries and make a positive mark on our society.

I thank you for your interest in and support of our department. My hope is that you will find interesting news and discover how our dedication to mission benefits our society.

You can find all of our BME newsletters and a lot more at our BME website (URL). Follow us via Instagram, LinkedIn, and Twitter!

## BME Chair Grainger honored with Ole and Marty Jenson Endowed Chair in Tissue Engineering
